VIA: AIR

DISPATCH NO: EGFA 18790

TO : Chief of Base, Munich

DATE: 4 November 1957

FROM : Chief of Base, Frankfurt

INFO: EE  
COS

SUBJECT: General - Operational/UPSWING/CALL/CART  
Specific .. CARETTINA

REFERENCE: EOLA 25356, dated 18 October 1957

1. In view of the points made in Reference, we believe it is okay to inform OTTO that you have contacted [ ] through channels and have received the following, through channels.

2. [ ] has not seen the medical report per se (the truth) but was informed by the doctor immediately after the examination that CARETTINA did suffer a massive anterior cardiac infarction about a year ago but this has healed without leaving any of the malfunction or disturbance which often follows such cases. CARETTINA does seem to suffer from a mild angina. He is not a cardiac invalid, but doctor advised he must for the rest of his life observe moderation in all respects. He could live for years, if he observes moderation. If he does not take care of himself, however, it is likely that he will die of a heart attack of the same sort which occurred a year ago.
